SLEEK™ Catheter - rapid-exchange balloons for trackability across infrapopliteal lesions

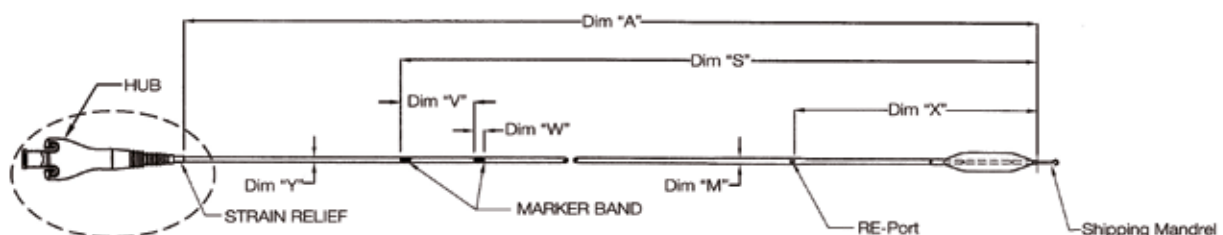

Ultra low profile balloons designed specifically for accessing distal lesions

- 40-220 mm balloon lengths
- 2-4 mm balloon diameters
- 150 cm shaft lengths

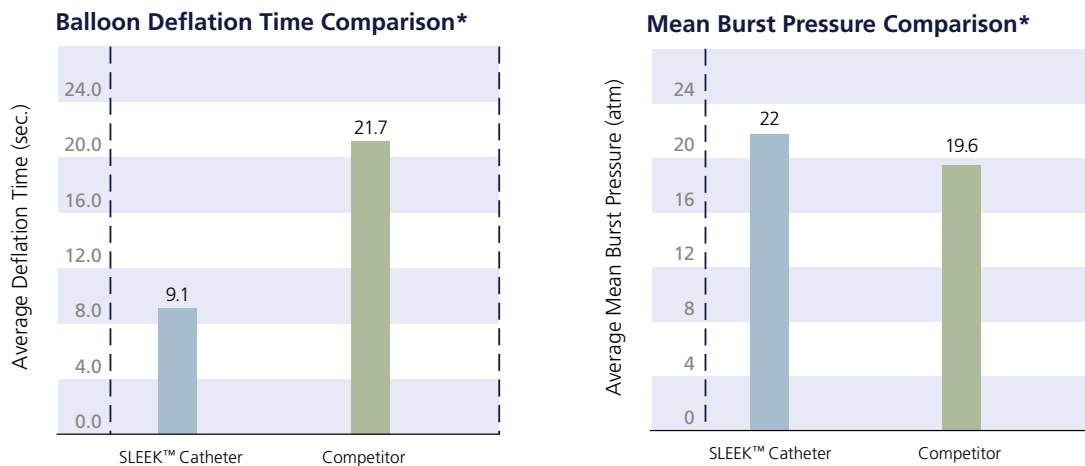

Deliverability and crossability in infrapopliteal lesions

- Trackability in a single-operator, rapid-exchange platform
- Proprietary SLX™ lubricious coating on the balloon and the distal shaft
- Low profile 4F sheath introducer compatibility for all sizes
- Stainless steel hypotube shaft
- Nylon balloon material combines flexibility and durability with lower compliance
- High rated burst pressures of up to 16 atm
- Short balloon shoulders for precise, controlled dilatation

SLEEK™ Catheter - balloon performance for intrapopliteal lesions

SLEEK™ Catheter - superior balloon performance for intrapopliteal lesions
